SUMMARY

Recent Florida State University Computer Science graduate wrapping up an IT helpdesk internship. Certified in AWS and CompTIA A+, with hands-on experience managing Active Directory and supporting Microsoft enterprise environments. Transitioning from user support to a Systems Administrator role to tackle larger infrastructure challenges and take ownership of core IT operations.

EDUCATION

Florida State University

May 2026

B.S. in Computer Science | GPA: 3.2

Tallahassee, FL

Relevant Courses: C++ Data Structures & Algorithms, Databases, Python, Software Engineering, Linear Algebra, Operating Systems, Data Science

Clubs/Activities: Association for Computing Machinery (ACM) Club (Member) and AWS Cloud Club (Member)

TECHNICAL SKILLS

Systems Administration: Active Directory, Azure, Group Policy (GPO), Linux, Hardware & Network Printer Diagnostics

Cloud & Infrastructure: AWS (EC2, S3, RDS), Docker, Nginx, Git, CI/CD, Windows 365

Languages & Databases: Python, SQL (PostgreSQL), JavaScript, C++

Web Technologies: Node.js, React, REST APIs, OAuth2.0

EXPERIENCE

IT Helpdesk Administrator Intern

May 2026 - Present

Dream Finders Homes

Jacksonville, FL

- Administered user accounts and access controls across Active Directory and Azure environments, including Group Policy management.
- Provided technical support and troubleshooting for core enterprise applications like Microsoft Office, Adobe, etc.
- Configured, deployed, and maintained office hardware, resolving network printer faults and local device issues for end users.

Undergraduate Research Assistant

Sep. 2024 - Apr. 2025

Florida State University - Department of Scientific Computing

Tallahassee, FL

- Conducted computational research on boron nitride (BN) atomic structures using Python and HPC clusters
- Generated and analyzed 900+ candidate configurations using CALYPSO (particle swarm optimization) on FSU's HPC infrastructure via SLURM job scheduling
- Troubleshoot and migrated legacy Python 2 codebase to Python 3, resolving compatibility issues
- Presented research findings in a poster at FSU's Undergraduate Research Symposium to faculty and 250+ attendees

PROJECTS

Stock Portfolio Tracker (www.trendtracker.co)

2024-Present

Node.js, Express, PostgreSQL, React, Python, Twilio, Plaid API, Finnhub API, Yfinance, Docker, OAuth2.0, bcrypt

- Engineered a full-stack finance platform enabling users to track investments and sync bank transactions via Plaid API with real-time data visualization
- Integrated Plaid API for secure bank account linking with AES-256-GCM encrypted access tokens, supporting automatic daily transaction syncing
- Implemented enterprise-grade security including dual authentication (Google OAuth/bcrypt), and audit logging
- Built budget management system with spending analytics, goals, and automated alerts via email and SMS
- Developed Python scripts for data processing supporting full stock coverage across 6 chart timeframes, with intelligent API rate limiting and caching
- Containerized application using Docker multi-stage builds and self-hosted on a Linux Debian server

CERTIFICATIONS

- AWS Certified Cloud Practitioner (CCP), Amazon Web Services
- CompTIA A+ Certification

Oct. 2025

June 2025
